SyStack Enterprise Deployment Guide

Overview

This guide covers the automated provisioning of **SAOS Enterprise** and **Enterprise XL** tiers with: - Multi-region VPS deployment (up to 5 locations) - SOC 2 / HIPAA / GDPR compliance documentation - White-label dashboard generation - Tailscale mesh networking across locations - Automated audit logging and monitoring

Prerequisites

REQUIREMENT	DETAILS
Vultr API Key	With instance creation permissions
Tailscale Auth Key	Reusable, tagged for <code>tag:saos-client</code>
Client Info	ID, email, brand colors, logo URL

REQUIREMENT	DETAILS
Compliance Needs	SOC2, HIPAA, GDPR, CCPA (comma-separated)

Quick Start

1. Provision Enterprise Infrastructure

```
cd /tmp/systack-saas-init

python3 scripts/provision_enterprise.py \
  --client-id ACME-CORP \
  --tier enterprise \
  --locations ord,lax,lon \
  --email "admin@acme.com" \
  --agent-name "AcmeAgent" \
  --compliance SOC2,HIPAA,GDPR \
  --wait
```

2. Generate White-Label Dashboard

```
python3 scripts/generate_dashboard.py \
  --client-id ACME-CORP \
  --client-name "Acme Corporation" \
  --primary-color "#1a365d" \
  --accent-color "#0ea5e9" \
  --logo-url "https://acme.com/logo.png" \
  --locations ord,lax,lon \
  --compliance SOC2,HIPAA,GDPR
```

3. Deploy Dashboard to VPS

```
# Copy dashboard to primary VPS
rsync -av dashboards/ACME-CORP/ root@<primary-ip>:/var/www/dashboard/

# Configure nginx (on VPS)
ssh root@<primary-ip> "
  apt install -y nginx
  ln -s /opt/systack-dashboard/nginx.conf /etc/nginx/sites-enabled/dashboard
  systemctl restart nginx
"
```

Available Regions

REGION	CITY	COUNTRY	COMPLIANCE
ord	Chicago	US	SOC 2, GDPR
lax	Los Angeles	US	SOC 2, CCPA
lon	London	UK	GDPR, UK-GDPR

REGION	CITY	COUNTRY	COMPLIANCE
ams	Amsterdam	NL	GDPR
fra	Frankfurt	DE	GDPR, BSI

Tier Specifications

SPEC	ENTERPRISE	ENTERPRISE XL
Price	\$799/mo	Custom
VCPU	8	16
RAM	32 GB	64 GB
Storage	320 GB NVMe	640 GB NVMe
Bandwidth	6 TB	Unmetered
Backups	Hourly	Continuous
DDoS Protection	✔ Included	✔ Included
Multi-Location	Up to 5	Unlimited
Custom Agents	10+	Unlimited

Compliance Documentation

The provisioning script auto-generates compliance documentation in: `docs/compliance/{client_id}/`

Generated Documents

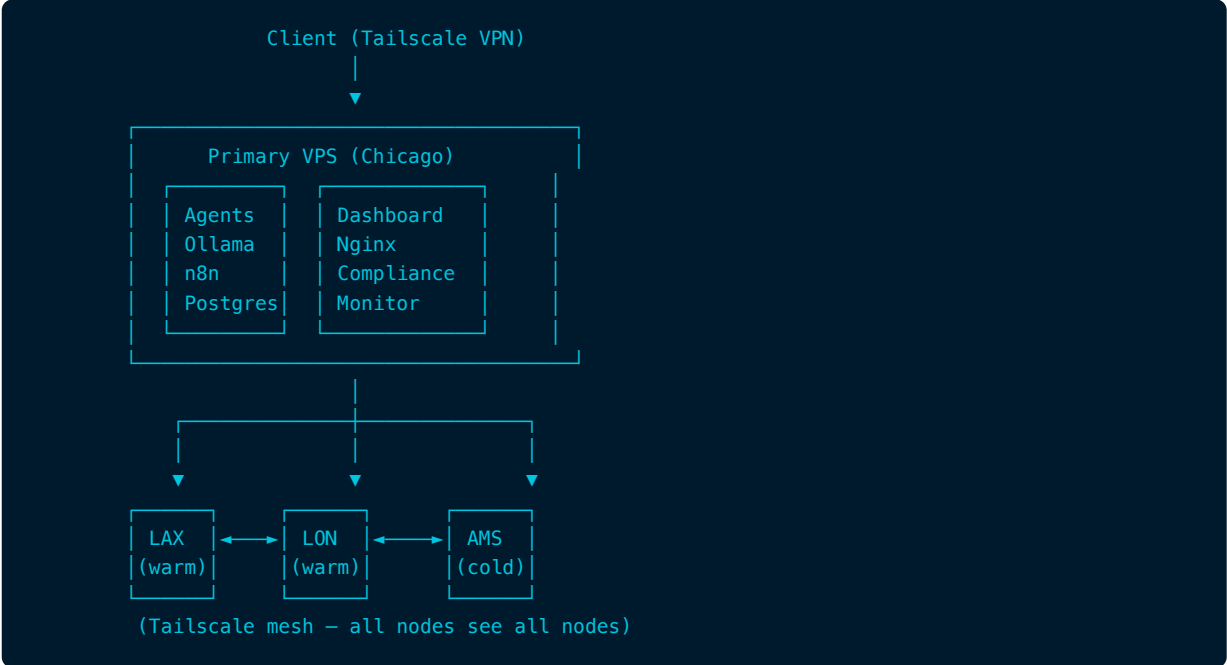

DOCUMENT	CONTENTS
SOC2-Readiness.md	Controls assessment, gaps, remediation timeline
HIPAA-BAA-Template.md	Business Associate Agreement template
GDPR-DPA.md	Data Processing Agreement with subprocessor list

Compliance Features Deployed

FEATURE	IMPLEMENTATION
Encryption at Rest	LUKS disk encryption + AES-256-GCM
Encryption in Transit	TLS 1.3 + Tailscale WireGuard
Audit Logging	kernel auditd + application logs
Access Control	RBAC + Tailscale device tags
Backup Encryption	Encrypted snapshots with 30-day retention

FEATURE	IMPLEMENTATION
Monitoring	Continuous health checks

Architecture

Verification Checklist

After deployment, verify:

```
# Check all VPS instances
python3 -c "
from scripts.provision_vps import VultrProvisioner, load_credentials
prov = VultrProvisioner(load_credentials()['vultr'])
for inst in prov.list_instances():
    if 'ACME-CORP' in inst['label']:
        print(f'{inst["label"]}: {inst["status"]} @ {inst.get("main_ip", "pending")}')
"
```

```
# Verify Tailscale mesh
ssh root@<primary-ip> "tailscale status | grep saos-"
```

```
# Check compliance monitor logs
ssh root@<primary-ip> "tail -20 /var/log/systack-compliance.log"
```

```
# Verify dashboard
open https://<primary-ip>/dashboard
```

Troubleshooting

ISSUE	SOLUTION
Secondary region fails	Check Vultr capacity; try different region
Tailscale not meshing	Verify tags match <code>tag:saos-client</code>
Dashboard not loading	Check nginx config, firewall port 443
Compliance monitor warnings	Review <code>/var/log/systack-compliance.log</code>

Next Steps

1. **Custom domain** — Point client domain to primary VPS IP
2. **SSL certificate** — Run `certbot` for HTTPS
3. **Client training** — Schedule walkthrough of dashboard
4. **Handoff** — Transfer admin credentials via secure channel
