Part I: About SyStack

Who We Are

SyStack builds autonomous operations infrastructure for businesses that refuse to operate at human speed.

Every business has repetitive work that shouldn't require a human. We build the infrastructure — intelligent agents, workflow automations, and orchestration layers — that removes the friction between “need it done” and “it's done.”

Our Mission

By 2028, every business operating at fewer than 50 employees will have a digital operations layer as standard as a website. SyStack defines what that layer looks like, how it integrates, and how it scales.

What We Believe

VALUE	WHAT IT MEANS
Ship Over Slides	Working systems, not presentations. Every deliverable is tested end-to-end.
Remove Drudge, Not People	Our systems don't replace your team. They remove the parts of the job that waste human attention.
Your Data, Your Control	Information stays with you. We build, you own.
No Black Boxes	You see what we built, how it works, and how to maintain it. Transparency in everything.
Earned Trust	We don't promise what we can't deliver. We document what we delivered so it lasts.

Part II: The Digital Operations Layer

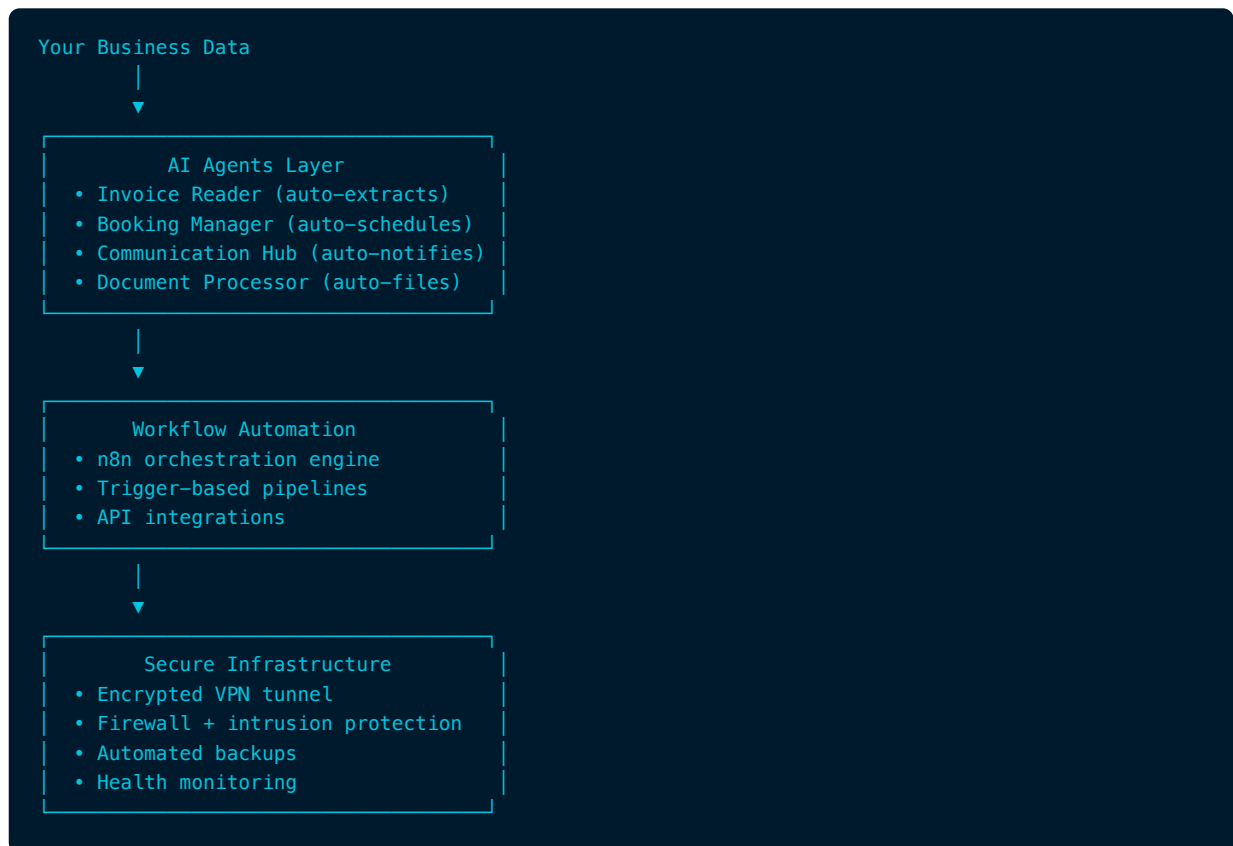

What Is SAOS?

SAOS (SyStack Autonomous Operations Stack) is a fully managed AI-powered operations layer deployed to a dedicated cloud environment. It includes:

- **Intelligent Agents** — Specialized AI assistants for different business functions
- **Workflow Automation** — n8n-powered automations connecting your tools
- **Secure Networking** — Zero-configuration VPN access via Tailscale
- **Local AI Inference** — Private, self-hosted AI model for document processing and analysis
- **Database & Storage** — Managed PostgreSQL and SQLite
- **Email Integration** — SMTP/IMAP connections for invoice capture and communication
- **Monitoring & Backups** — Automated health checks and hourly snapshots

Think of SAOS as your business's digital nervous system: it observes, processes, and responds — automatically.

How It Works

Part III: Service Plans

SAOS Subscription Tiers

Choose the plan that fits your business size and automation needs.

FEATURE	STARTER	PROFESSIONAL	BUSINESS	ENTERPRISE
Monthly Price	\$49	\$149	\$299	Custom
VPS Resources	1 vCPU / 1GB RAM	2 vCPU / 4GB RAM	4 vCPU / 16GB RAM	8 vCPU / 32GB+
AI Model	—	qwen2.5:7b	qwen2.5:7b + Whisper	Multi-model cluster
Included Agents	3 core	7 core	Full fleet (10)	Custom agents
Workflow Limit	5	20	Unlimited	Unlimited
Storage	25 GB SSD	80 GB SSD	160 GB NVMe	320 GB NVMe
Data Transfer	1 TB/mo	3 TB/mo	6 TB/mo	Unmetered
Backups	Weekly snapshots	Daily snapshots	Hourly snapshots	Continuous replication
Support	Email (24h)	Email + Chat (24h)	Priority + Phone (24h)	Dedicated + SLA
Typical Setup	5 minutes	10 minutes	8 minutes	15 minutes

What’s Included in All Plans

- **Zero-Config VPN** — Tailscale provides secure access from any device
- **Firewall Protection** — UFW + fail2ban blocks unauthorized access
- **Security Updates** — Automated patching and vulnerability management
- **PostgreSQL Database** — Relational data storage for your applications
- **Email Processing** — SMTP/IMAP integration for invoice and order capture
- **Webhook Endpoints** — Receive events from Stripe, Square, and custom sources
- **Agent Memory** — Persistent context across conversations and workflows

What’s Not Included (Available Separately)

- **Custom Domain** — Your vanity URL for white-label deployments
- **Multi-Location Replication** — Geographically distributed backups
- **Advanced Compliance** — HIPAA, SOC 2, or custom audit frameworks
- **Custom AI Training** — Fine-tuned models on your proprietary data

Part IV: Products & Integrations

Invoice Automation

What it does: Reads incoming invoices via email, extracts data automatically (vendor, amounts, line items), stores in a searchable database, presents in a web dashboard.

Supported formats: PDF (native + scanned with OCR), images (PNG/JPG), email body text

Accuracy: 95%+ on structured invoices, 85%+ on scanned documents

Demo: Available upon request

Online Ordering System

What it does: White-label food ordering with integrated payment processing, kitchen display, and customer notifications.

Features: Menu builder, real-time order tracking, Square payment integration, SMS/Email confirmations

Live example: Utopia Deli (<https://order.theutopiadeli.com>)

Setup time: 2-4 weeks for custom branding

No-Show Prevention

What it does: Booking system with automated reminders (SMS + email) and one-click reschedule.

Features: T-24h, T-2h, and T-15min reminders, calendar integration, waitlist management

Typical result: 40-60% reduction in no-shows

Integration: Works with Square, Google Calendar, and custom booking forms

VPS Provisioning Pipeline

What it does: Automated cloud infrastructure deployment for businesses needing dedicated environments.

Use case: Franchises needing identical systems across locations, agencies managing client infrastructure

Deployment time: Under 10 minutes from order to ready

Management: Fully managed with automated updates

Part V: Security & Compliance

Security Standards

LAYER	PROTECTION
Network	WireGuard VPN (Tailscale), firewall rules, intrusion detection
Transport	TLS 1.3 encryption for all connections
Storage	AES-256 encryption at rest
Access	Role-based permissions, no shared credentials
Updates	Automated security patches, tested before deployment
Backups	Encrypted snapshots with configurable retention
Monitoring	24/7 automated health checks with alerting

Compliance Framework

SyStack maintains compliance documentation for:

STANDARD	STATUS	NOTES
GDPR	✔ Implemented	Data residency options available
CCPA	✔ Implemented	Consumer rights management built-in
SOC 2 Type I	🟡 In Progress	Estimated Q3 2026
HIPAA	🟡 Available**	Enterprise tier only; requires assessment
PCI DSS	🟡 Partial	Stripe handles card data; we don't store it

** Additional compliance frameworks available on Enterprise tier with custom assessment.

Data Handling

QUESTION	ANSWER
Where is my data stored?	On your dedicated VPS (US-based by default). EU hosting available.
Who has access?	You control access. No SyStack staff access without explicit authorization.
Can I export my data?	Yes — full database dumps available anytime via

QUESTION	ANSWER
	support.
How long is data retained?	Configurable. Default: 7 years for business records, 90 days for logs.
What happens if I cancel?	30-day grace period for data export, then secure deletion.

Part VI: Getting Started

Onboarding Process

STEP	WHAT HAPPENS	TIMELINE
1. Discovery	We discuss your operations, pain points, and goals.	30-60 min call
2. Proposal	Custom implementation plan with timeline and pricing.	24-48 hours
3. Agreement	Signed SOW and initial payment.	Your pace
4. Deployment	We provision your SAOS instance.	10 minutes
5. Configuration	Integrate your tools (Square, email, calendar, etc.).	1-3 days
6. Training	Walkthrough of your system with documentation.	1 hour
7. Go-Live	Monitor first week closely, adjust as needed.	Ongoing

Support Expectations

ISSUE TYPE	RESPONSE TIME	RESOLUTION TARGET
Service Down	Under 30 minutes	2-4 hours
Feature Broken	Under 2 hours	Same day
Performance Slow	Under 4 hours	24 hours
General Question	Under 24 hours	72 hours
Feature Request	Under 48 hours	Roadmap discussion

Critical issues: Call the emergency line (provided after signup)

Non-critical: support@systack.net or in-app chat

Part VII: Frequently Asked Questions

Q: Is my data safe with AI processing?

A: Yes. For Business and Enterprise tiers, AI runs entirely on your dedicated VPS. No data is sent to third-party AI services. Documents are processed locally and never leave your environment.

Q: Can I cancel anytime?

A: Yes. All plans are month-to-month. Cancel before your renewal date and receive a prorated refund for unused days.

Q: What if I outgrow my plan?

A: Upgrades are instant — we resize your VPS or provision a larger one with zero downtime. Your data transfers seamlessly.

Q: Do you offer refunds?

A: Yes. 30-day money-back guarantee for all plans. If SAOS doesn't measurably improve your operations, we'll refund 100%.

Q: Can you integrate with our existing tools?

A: Almost certainly. We connect with 400+ apps via n8n integrations, custom APIs, and webhook endpoints. During discovery, we'll map your full tool stack.

Q: What kind of businesses benefit most?

A: Businesses with repeatable processes: appointment booking, invoice processing, order management, customer communication. Typically 5-50 employees.

Q: Is there a trial?

A: Yes. 14-day free trial on Professional and Business tiers. No credit card required. Full feature access.

Appendix: Glossary

TERM	DEFINITION
SAOS	SyStack Autonomous Operations Stack — our managed operations layer
Agent	Specialized AI assistant for a specific business function
Workflow	Automated sequence of steps triggered by an event
n8n	Open-source workflow automation engine we use
Tailscale	Zero-configuration VPN for secure remote access
Ollama	Local AI model server for private document processing
VPS	Virtual Private Server — your dedicated cloud instance
Webhook	HTTP callback that notifies your system of external events
OCR	Optical Character Recognition — reading text from images/scans
